

VEHICLE & ACCESS

Storage & quick changes *Keeping the entertainment flowing...*

VEHICLE ACCESS

- We usually carry a lot of kit and costumes especially for the Streetfest package and our interactive puppet plays. So the closer we can get to our performance site to unload the better and it is a lot quicker.

VEHICLE ONSITE

- On some occasions we either request or require our vehicle to be onsite or as close to our area as possible. We have large theatrical hangings that can hide the vehicle on two or three sides. The reason we ask for the vehicle on site is because it is used for changing – especially stilt costumes and for storage of equipment and personal belongings. The nearer our base (our vehicle – the smoother the running of the entertainment). If our vehicle is not allowed on site we may insist on having lockable private dressing rooms.

**Please see NASA - National Association of Street Artists Network:
www.nasauk.org for suggested working conditions**

As a company of working performers we appreciate if bookers can make the most of the online office, information & contact facility. We also understand and agree with the need for telephone contact and for site visits and can arrange these when necessary.
